PRESBYTERIAN

Health Care Reform and You

The Patient Protection and Affordable Care Act (PPACA), commonly referred to as "health care reform," was signed into law on March 23, 2010. This legislation will result in changes to every American's health coverage.

Additional women's preventive services have been mandated as part of this act to be effective August 1, 2012. Presbyterian will comply with all provisions of the law including those that impact your prescription drug coverage. Refer to your plan materials to determine if your plan includes a Women's preventive medication coverage feature.

Under the women's preventive service, the Preferred Products listed below will not apply a copay or co-insurance and are not subject to any deductible or out-of-pocket maximums. This list is product specific. All other forms of oral contraceptives, injectable contraceptives, or contraceptive devices will follow the standard 4-Tier Commercial/PIC formulary copay structure.

Oral Contraceptives

NDC Number	Preferred Product Name	Compare to*
