

ABDOMINAL ULTRASOUND/RENAL ARTERIAL ULTRASOUND TEST INSTRUCTIONS

You have been scheduled to have an abdominal ultrasound or a renal arterial ultrasound test. The purpose of this test is to examine the major arteries within your abdomen.

- ♥ You may eat and drink up to 6 hours before the test.
- ♥ If you are diabetic you may have a light liquid meal up to 3 hours before the test.
- ♥ You may take your morning medications with a limited amount of water.
- ♥ Do not chew gum or smoke on the day of the test.
- ♥ Wear comfortable clothing with a separate top and bottom.

We are pleased to answer your questions or discuss your condition with other health care professionals.
