New Mexico’s Done By One (DBO) Childhood Immunization Schedule is fully compatible with the recommendations of the Advisory Committee on Immunization Practice (ACIP) of the Centers for Disease Control and Prevention (CDC), the American Academy of Pediatrics and the American Academy of Family Physicians. DBO simply schedules shots to be given at the earliest age allowed by the ACIP. In using this schedule, make sure that minimum intervals between shots in a series are observed. If you have any questions, call the New Mexico Immunization Hotline toll-free at 1-888-231-2367.

Shots can be given even when your child has a minor illness. If your child is not up-to-date, your child’s Primary Care Practitioner can make a plan to make sure all shots are complete. Take your child’s shot record with you to every healthcare visit.

Your child’s Primary Care Practitioner may adjust this schedule based on what is best for your child. Remember, your child is not protected against these diseases until all doses have been given.

Presbyterian serves to improve the health of individuals, families, and communities.
