Bronchial Thermoplasty For Treatment of Asthma
MPM 2.13

Disclaimer
Refer to the member’s specific benefit plan and Schedule of Benefits to determine coverage. This may not be a benefit on all plans or the plan may have broader or more limited benefits than those listed in this Medical Policy.

Description
Bronchial thermoplasty (BT) is a bronchoscopic procedure that employs radiofrequency ablation to reduce the mass of airway smooth muscle (ASM), thus attenuating bronchoconstriction. Bronchial thermoplasty is performed on an outpatient basis with conscious sedation (i.e., no general anesthesia is needed), and it usually takes approximately one hour to complete. Treatment consists of 3 separate treatments approximately 3 weeks apart. Bronchial Thermoplasty is used to treat severe, persistent, refractory, asthma that does not improve despite treatment with multiple modalities.

Coverage Determination/ Clinical Indications
Bronchial Thermoplasty has been reviewed by the Technology Assessment Committee. Presbyterian considers Bronchial Thermoplasty Investigational and Experimental and there is not enough data to support efficacy therefore it is not covered.

Medical Terms
Asthma – A respiratory disorder, often of allergic origin, characterized by difficulty breathing, wheezing, and a sense of constriction in the chest.

Bronchial – relating to the bronchi (two main branches of the trachea)

Bronchoscope- A thin flexible instrument used to view the air passages of the lungs.

Radiofrequency- Thermal energy of a certain frequency range.

MPM 2.13

Approval Signatures: Clinical Quality Committee: Thomas Rothfeld MD

Medical Director: Norman White MD

Approval Date: March 22, 2017

Publication History: 09-23-15 : Original effective date
01-27-16: Annual review
03-22-17: Annual Review. No change.

This Medical Policy is intended to represent clinical guidelines describing medical appropriateness and is developed to assist Presbyterian Health Plan and Presbyterian Insurance Company, Inc. (Presbyterian) Health Services staff and Presbyterian medical directors in determination of coverage. This Medical Policy is not a treatment guide and should not be used as such.

For those instances where a member does not meet the criteria described in these guidelines, additional information supporting medical necessity is welcome and may be utilized by the medical director in reviewing the case. Please note that all Presbyterian Medical Policies are available on the Presbyterian Healthcare Services website at: http://www.phs.org/phs/healthplans/providers/healthservices/Medical/index.htm
