Unicompartmental Knee Replacement
MPM 41.0

Disclaimer
Refer to the member’s specific benefit plan and Schedule of Benefits to determine coverage. This may not be a benefit on all plans or the plan may have broader or more limited benefits than those listed in these criteria. Prior Authorization is required. Please use the Prior Authorization/Benefit Certification Guide to determine when a prior authorization/benefit certification is required: https://ds.phs.org/preslogin/index.jsp

Description
In unicompartmental knee replacement (also called "partial" knee replacement) only a portion of the knee is resurfaced. This procedure is an alternative to partial knee replacement for patients whose disease is limited to just a single damaged compartment of the knee, such as:
- Medial or lateral
- Patellofemoral

Coverage Determination
Benefit is covered for Medicaid and Commercial and Medicare members.

I. PARTIAL KNEE REPLACEMENT
Clinical Indications for Procedure
- Distal femur fracture
- Malignancy of distal femur, proximal tibia, knee joint, soft tissues
- Avascular necrosis of the knee
- Revision
- Partial knee arthroplasty for the above four indications will be approved based upon indication for the procedure alone.
- Advanced degenerative joint disease, as indicated by:

A. Symptoms (1 or more of the following):
   1. Disabling pain
   2. Significant functional disability

B. Radiological findings consistent with significant osteoarthritis (at least two of the following):
   1. Severe joint space narrowing
   2. Osteophyte formation
   3. Joint subluxation
Unicompartmental Knee Replacement

4. Deformity or mal-alignment
5. Subchondral sclerosis
   OR
6. Arthroscopic findings of severe denudation of articular cartilage.

AND

C. Optimal medical management has been tried and failed for (please see recommendations for non-operative treatment of knee and osteoarthritis), including:

1. Self-management program (≥ 6 weeks) that includes
   a. Strengthening AND
   b. Low impact aerobic activities
   AND one of the following:
   c. Physical therapy
   d. Adjunctive range of motion/stretching exercises
   e. Joint off-loading (cane, walker)
   f. Bracing
   g. Reasonable restriction of activities

2. Weight Loss
   a. In patients with a BMI > 40 (should include medically directed weight loss program)

3. Medications
   a. NSAIDS if tolerated and not contraindicated.
      Prescription OR over-the-counter (at adequate doses).
   OR
   b. If NSAIDs not tolerated or contraindicated:
      • Analgesics
      • Acetaminophen
      • Tramadol
      • Corticosteroid injections
      • Hyaluronic acid injections

AND

Not every Presbyterian health plan contains the same benefits. Please refer to the member’s specific benefit plan and Schedule of Benefits to determine coverage. [MPMPPC051001]
D. Documentation that clearly shows the patient has participated in or is scheduled for Pre-Procedure education which covers all of the following: **
   1. Pre-operative preparation
   2. Post-operative anticoagulation
   3. Pre- and post-operative exercises
   4. Home safety and equipment
   5. Post-op expectations and goals for movement and function
   6. Considerations for post-hospital disposition
   7. Plans for rehab services after surgery

**May include group classes such Presbyterian HealthPlex joint replacement classes (preferred), videos, reading materials from professional societies, or counseling from MD-designated professional

See Medical Optimization Criteria below for additional information to be met prior to partial joint replacement.

### Medical Optimization Criteria

For patients with any of the below-listed diagnoses, the following conditions must have been met prior to Partial joint replacement:

1. Obesity
   a. Patients with a BMI >40 must undergo efforts at weight loss
   b. Require participation in medically directed weight loss program.
   c. Documentation of participation and weight loss
   d. A BMI of ≤ 40 should be obtained prior to surgery unless the surgeon’s judgment dictates otherwise in cases of severe or progressive bone loss, deformity, or the symptoms progress/worsen in the face of active interventions (requires medical director review and orthopedist attestation)

2. Smoking (includes cigarette, cigar, and vaporized form of nicotine)
   a. Cessation at least 6 weeks prior to elective TJA
      or

Not every Presbyterian health plan contains the same benefits. Please refer to the member’s specific benefit plan and Schedule of Benefits to determine coverage. [MPMPPC051001]
b. Require participation in smoking cessation program and documentation of this, such as Quit For Life, [QuitNowNM.com](http://QuitNowNM.com).

3. Diabetes
   a. HBA1c must be less than 7.5 to proceed with surgery unless control is felt to be optimized for the individual in the opinion of the treating physician or endocrinologist (requires attestation if above 7.5)

4. Rheumatoid arthritis + autoimmune disorders
   a. Documented discussion between patient and rheumatologist or orthopedist and rheumatologist regarding medication management in the perioperative time frame to improve wound healing and lessen risk of infection.

5. Active substance abuse/dependence
   a. Partial joint replacement will not be authorized in members with active alcohol or intravenous drug abuse or dependence.
      - ETOH abuse – needs documentation of program
      - IVDA- needs documentation of program AND negative urine toxicology screen

6. Absence of
   a. Open skin lesions on the operative limb.
   b. Active infection

**Note:** The above medical optimization requirements may be deferred if, in the judgment of the treating surgeon, requiring a patient to endure these non-operative measures in the face of severe OA or in cases of severe or progressive bone loss or deformity, would cause undue suffering or potentially compromise outcomes of delayed joint replacement (requires surgeon attestation and medical director review).

**Coding**

The coding listed in this medical policy is for reference only. Covered and non-covered codes are within this list.
